

# Goose-GMSE Simulation summary

*Generated on 2020-02-04 12:50:13*

## Input parameters

Parameter	Value
No. of simulations	5
Number of years projected	5
Maximum no. culled	2000
Population target	32000

## Output

In 2020 the projected population size was between 33185 and 37000 individuals.

The projected population in 2020 does not overlap with the population target of 32000

After 5 projected years, the mean population size is predicted to be 2934 individuals above the population target of 32000

The projected population does not overlap the target in any of the projected years

### Numbers culled per projected year

Year	Mean projected pop. size	Mean no. culled	SD culled	Min. culled	Max. culled
2016	36821	2000	0	2000	2000
2017	37903	2000	0	2000	2000
2018	35546	2000	0	2000	2000
2019	37223	2000	0	2000	2000
2020	34934	2000	0	2000	2000
