

Goose-GMSE Simulation summary

Generated on 2020-02-04 12:41:49

Input parameters

Parameter	Value
No. of simulations	5
Number of years projected	5
Maximum no. culled	2000
Population target	32000

Output

In 2020 the projected population size was between 34257 and 35807 individuals.

The projected population in 2020 does not overlap with the population target of 32000

After 5 projected years, the mean population size is predicted to be 2915 individuals above the population target of 32000

The projected population does not overlap the target in any of the projected years

Numbers culled per projected year

Year	Mean projected pop. size	Mean no. culled	SD culled	Min. culled	Max. culled
2016	36833	2000	0	2000	2000
2017	37896	2000	0	2000	2000
2018	35615	2000	0	2000	2000
2019	36963	2000	0	2000	2000
2020	34915	2000	0	2000	2000
